MCMURDO WEATHER FORECAST INFORMATION
THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM

REGIONAL WEATHER SUMMARY

High pressure begins decaying as several small eddies around Ross Island develop throughout the day, causing additional partial cloud cover and occasional brief periods of wind gusts. Cloud cover from an adjacent trough in the Ross Sea and a low on the Ross Ice shelf will cause layers of cloud to move in throughout the day.
