PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

This morning finds Anvers Island between two Lows; one out to the east of the Peninsula and the other to the west-northwest, with beautiful weather currently over the Station. The Low to the northwest moves just north of the island tonight, and stretches out over the southern Drake Passage into a broad area of low pressure, bringing periods of light snow into the region overnight. The area of low pressure forms two separate Lows that re-orient in a more southeast-northwest fashion, keeping the likelihood of precipitation in the area through Saturday. Happy New Years Eve Palmer Station!!
