**PALMER STATION WEATHER FORECAST INFORMATION**

**THIS INFORMATION IS FOR OFFICIAL USE ONLY  
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED  
BY THE UNITED STATES ANTARCTIC PROGRAM**

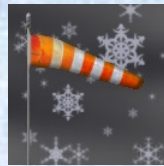

**REGIONAL WEATHER SUMMARY**

Strong Low pressure east of the Peninsula continues to sit and spin, as a ridge of High pressure builds into the area from the west. The coupled effect will keep cloudy skies with periods of snow over the area, along with a decent southwesterly flow. The ridge gets pushed to the north tomorrow morning as the next system presses in from the west, bringing a few more shots of snow over the Anvers Island region, with the heaviest occurrence on Saturday morning. Temperatures remain on the cool side before warming up once again on Saturday.

**Today**  
3 February

**Tonight**

**Tomorrow**  
4 February
