PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

A trough extends towards the peninsula from a low pressure center moving on shore in South America. The stronger winds and heavier snow associated with this feature are well south of Anvers Island, but sporadic snow showers are expected at Palmer, with the heaviest snow coming tomorrow, as a low generated by that trough makes its way up the peninsula towards the station.

Today
12 July

Tonight

Tomorrow
13 July
