PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

Winds will increase in force today, and snow will be nearly continuous as low centers approach Anvers Island within an already tight pressure gradient around the persistent central low in the Bellingshausen. Gusts near or above hurricane force are likely depending on the exact landfall location of the low centers; expect the strongest winds of this period late this evening then periodically through the day tomorrow.

Today
7 June

Tonight

Tomorrow
8 June
