PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

Expect a glancing blow from a low center this morning, with gust potential up to 60 knots as it circulates around the Bellingshausen Sea low, then strikes land southwest of Anvers Island. The Bellingshausen low will then make its way inland towards the Thwaites area, setting up a change in the weather pattern over the coming days. The first sign of that change will be the decrease in winds reflected in the latter part of this forecast.

Today
28 June

Tonight

Tomorrow
29 June

Sky: Cloudy

Visibility (SM): Unrestricted,
becoming 1-3 in snow
