REGIONAL WEATHER SUMMARY

Enjoy a period of benign weather between lows this morning, but lowering clouds will herald the onset of slightly gustier winds with snow and mixed precipitation in the late afternoon/evening hours. A fairly weak low center moving towards the peninsula just north of Anvers Island is the culprit; its departure will provide another respite early tomorrow before an approaching strong trough ends this period on a downward trend.

Today
22 March

Tonight

Tomorrow
23 March

Sky: Mostly Cloudy to Cloudy

Visibility (SM): Unrestricted, 1-2 in patchy early morning fog becoming 3-5 in snow, mixed precipitation
