PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

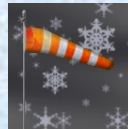

REGIONAL WEATHER SUMMARY

Strong winds this period, with gusts to hurricane force as a series of powerful troughs move through the area. Expect that to drive significant amounts of mixed precipitation in a more horizontal direction than most would prefer, thus lowering visibility and wind chill - the former particularly during periods of heaviest snow. The system should weaken to tropical storm force gusts by evening, but re-intensify a bit tomorrow.

Today
24 March

Tonight

Tomorrow
25 March

Sky: Cloudy

Visibility (SM): 2-4 in mixed precipitation, frequently less than 1 in snow, blowing snow
