**PALMER STATION WEATHER FORECAST INFORMATION**

**THIS INFORMATION IS FOR OFFICIAL USE ONLY  
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED  
BY THE UNITED STATES ANTARCTIC PROGRAM**

**REGIONAL WEATHER SUMMARY**

A strong low pressure system will approach the Antarctic Peninsula today, then stall before reaching the Peninsula tonight and Tuesday. The proximity of this low will cause an extended period of windy conditions. Abundant moisture will combine with multiple disturbances rotating around this low to produce multiple periods of snow, though it may be mild enough early today for a brief change to rain or a rain-snow mix.

**Today**  
2 May

**Tonight**

**Tomorrow**  
3 May

**Sky:** Cloudy

**Visibility (SM):** Unrestricted with a few sprinkles or snow flurries early, becoming 1-3 in rain and/or snow early afternoon; then 1 or less in all snow late
