PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

The center of a large, strong low pressure system will remain nearly stationary about 200 miles west of the central Antarctic Peninsula. The proximity of this low will continue to drive strong NE winds at Palmer, even though this low will slowly weaken. Disturbances rotating clockwise around this low will combine with moisture to produce periods of snow. A gradual cooling trend will begin today.

Today
3 May

Tonight

Tomorrow
4 May
