PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

A warm front will move southeast through the southern Antarctic Peninsula today. The rather strong north flow behind this front will transport unusually moist, warm flow from the mid latitudes to Palmer through Sunday. Periods of heavy, wet snow are possible, with snow likely turning to rain at times on Sunday, as the melting level rises to near 5-thousand feet above the surface...a rare occurrence at Palmer.

Today
5 November

Tonight

Tomorrow
6 November

Sky: Cloudy

Visibility (SM): Unrestricted with flurries, becoming 2-4 with occasional 1 or less in snow
