PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

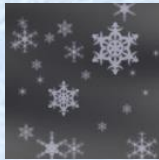

REGIONAL WEATHER SUMMARY

A low pressure system is developing in the Weddell Sea with a high pressure ridge strengthening over the west coast of the Antarctic Peninsula. Indications are for easterly winds becoming light and westerly through the forecast period. Expect periods of intermittent light precipitation today becoming more persistent tonight and tomorrow as low clouds move in from the south-southwest under high pressure.
