

**Tuesday, 7 February 2023**  
**PALMER STATION WEATHER FORECAST INFORMATION**

**THIS INFORMATION IS FOR OFFICIAL USE ONLY  
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED  
BY THE UNITED STATES ANTARCTIC PROGRAM**

**REGIONAL WEATHER SUMMARY**

The residual low pressure center has all but disappeared, leaving only a mild breeze and wet sleet as a reminder of its existence. However, a much larger and intense low pressure system is quickly advancing towards the Antarctic Peninsula. Wind speeds will quickly ramp up tomorrow after midday as the low crashes into Anvers Island with a hefty amount of rain due to warmer temperatures.

**Today**  
7 February

**Tonight**
