BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

One low pressure system moves east and intensifies in the Weddell Sea today as a second low pressure system rapidly tracks from the Southern Ocean into the Drake Passage and northern Antarctic Peninsula.

Indications are for strong west-northwest-north winds and persistent precipitation tapering off by late afternoon today. Expect next intensification early tonight due to approaching low from northwest causing strong northeast-east-southeast winds and persistent precipitation through tomorrow afternoon.
