Sunday, 25 June 2023 PALMER STATION WEATHER FORECAST INFORMATION

THIS INFORMATION IS FOR OFFICIAL USE ONLY AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED BY THE UNITED STATES ANTARCTIC PROGRAM

REGIONAL WEATHER SUMMARY

A low pressure system advances along the west coast of the Antarctic Peninsula into the Drake Passage today as a high pressure ridge intensifies and moves into the Bellingshausen Sea from the northwest. Indications are for steady northeasterly winds today with periods of precipitation lowering visibility. Expect favorable conditions tonight and tomorrow as high pressure moves into the region with northeasterly to easterly winds and temperatures trending colder.
