**PALMER STATION WEATHER FORECAST INFORMATION**

**THIS INFORMATION IS FOR OFFICIAL USE ONLY  
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED  
BY THE UNITED STATES ANTARCTIC PROGRAM**

**REGIONAL WEATHER SUMMARY**

A high pressure center in the Southern Ocean provides increasing southwesterly low level wind flow parallel to the west coast of the Antarctic Peninsula through the period. Indications are for favorable conditions today as winds become steady southwesterly. Expect increasing low level clouds and precipitation moving in from southwest late tonight and becoming more persistent tomorrow with periods of low visibility due to precipitation and fog as a weak surface trough develops along the coast.

**Today**  
27 June

**Tonight**

**Tomorrow**  
28 June

**Sky:** Mostly Cloudy

**Visibility (SM):** Unrestricted
