BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

A low pressure system in the Weddell Sea continues to move east as a high pressure ridge moves over the Antarctic Peninsula causing westerly low level winds. Indications are for west-southwesterly winds ushering in low level clouds with periods of low visibility due to precipitation today and tonight. For tomorrow expect clouds lifting, precipitation becoming less persistent, and north-northeast winds as high pressure ridge moves east and the next low pressure system advances into the Bellingshausen Sea.

Today
9 May

Tonight

Tomorrow
10 May
