PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

A series of low pressure troughs rotating around a low pressure center in the Bellingshausen Sea and a blocking high pressure ridge in the Weddell Sea, will cause strong north-northeast winds to continue for the Antarctic Peninsula through the forecast period. Indications are for periods of decreased visibility due to precipitation today and tonight, ending tomorrow, as cloud cover decreases and temperatures begin trending slightly warmer.

Today
22 May

Tonight

Tomorrow
23 May
