BY THE UNITED STATES ANTARCTIC PROGRAM**

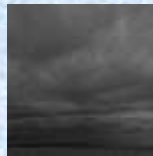

REGIONAL WEATHER SUMMARY

Low pressure is deepening on the Weddell Sea side of the Antarctic Peninsula. The result of this on the Anvers Island side is cold southwesterly flow, stratus and snow. These conditions will persist through late tonight. Tomorrow, a shift in the flow to an easterly wind will bring scattered skies and improved visibility, but continued cold and gusty winds.

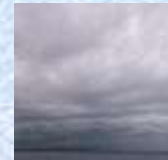

Today
19 September

Tonight

Tomorrow
20 September
