PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

REGIONAL WEATHER SUMMARY

High pressure expands from the Bellingshausen Sea and engulfs the Antarctic Peninsula. Meanwhile, a low in the Weddell Sea will drive moisture towards and across the Peninsula, causing clouds to move in and out throughout the day. As the high moves towards the Drake Passage, it will divide its center into two as it decays.

Today
3 August

Tonight

Tomorrow
4 August
