Sunday, 25 February, 2024 PALMER STATION WEATHER FORECAST INFORMATION

THIS INFORMATION IS FOR OFFICIAL USE ONLY AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED BY THE UNITED STATES ANTARCTIC PROGRAM

REGIONAL WEATHER SUMMARY

A strong high pressure ridge moving into the Drake Passage from the northwest will bring southwesterly gradient level winds parallel to the coastline of the northern Antarctic Peninsula and block a low pressure system to the south in the Bellingshausen Sea. Indications are for persistent low clouds, light precipitation, and periods of moderate rain/snow mix through period. Expect temperatures straddling freezing then trending warmer as winds turn northwesterly tomorrow.
