BY THE UNITED STATES ANTARCTIC PROGRAM**

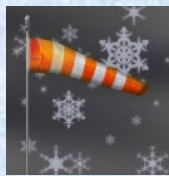

REGIONAL WEATHER SUMMARY

An intense low-pressure system in the Weddell Sea continues to develop and move east as a trough of low pressure moves into Anvers Island. Indications are for strong winds with precipitation becoming heavy at times through today and tonight. Expect a re-intensification of the low pressure trough tomorrow with increasing winds gusting up to 50 knots along with precipitation, heavy at times, and wind chills below 0F.
