PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

The remnants of a migratory low pressure system will still be felt early this morning as snow and reduced visibility continue to plague the station. Fortunately by mid-morning this system will pass over the Antarctic Peninsula leaving a somewhat stagnant pattern. This relative lull will allow for less cloud cover, and little to no precipitation on station today and tomorrow. Unfortunately, strong winds will reemerge tomorrow as the next system approaches from the west.

Today

10 September

Tonight

Tomorrow

11 September

Sky: Mostly Cloudy early AM becoming partly cloudy

Visibility (SM): 1-2 with snow and blowing snow early am and becoming unrestricted by mid morning

Wind (kts): W 10-15 becoming SE 20-25 gusting 35
