PALMER STATION WEATHER FORECAST INFORMATION

**THIS INFORMATION IS FOR OFFICIAL USE ONLY
AND IS LIMITED TO ACTIVITIES SPONSORED OR RECOGNIZED
BY THE UNITED STATES ANTARCTIC PROGRAM**

A large dynamic low will be transitioning across the Antarctic Peninsula this period but fortunately most of the energy associated with this system will be to the north of the station. Anvers Island will still see some impacts in the way of increased cloud cover and occasional light snow as the tail end of this system extends far enough south for some terrain induced precipitation (albeit light).

Today
12 September

Tonight

Tomorrow
13 September

Sky: Cloudy

Visibility (SM): Unrestricted with occasional 4-6 with light snow in the late afternoon

Wind (kts): NE 10

Max Temp: 00°C / 32°F

Min Wind Chill: -8°C / 18°F
