PALMER DAILY WEATHER FORECAST

This information is for official use only and is limited to activities sponsored or recognized by the United States Antarctic Program.

REGIONAL WEATHER SUMMARY

Anvers Island will see the influence of the pesky migratory low that has been sitting in the Weddell Sea today and continued cloud cover with an occasional snow shower will persist until this evening. Tonight we will see continued cloudy skies and light winds until tomorrow when yet another approaching low will bring increased winds and slightly cooler temperatures.

TODAY
8-Apr-2026
