Ref B:

**SURFACE ANALYSIS 25-Dec-2020 06Z**

Seas (FT)

**SURFACE FORECAST 26-Dec-2020 18Z**

**METSIT 06Z 25-Dec** Transient ridge of high pressure in the west-northwest will pass east of the ship track from 26/0000Z. Prior to ridge axis passage, expect periods of reduced visibility in fog. A deepening low center center will track northwest-to-southeast to the southwest of the track with the associated warm frontal area bringing reduced visibility in rain and fog. By 26/1800Z, the 968MB low will be located near 61S 071W moving southeast. Expect elevated wind speeds with improving sky cover and visibility from 26/1500Z-27/0300Z as the low tracks south of the ship position.

**FORECASTER NOTES** HAPPY HOLIDAYS!
