Seas (FT)

**SURFACE FORECAST 29-Nov-2020 12Z**

**METSIT 00Z 28-Nov** As you enter the open ocean this morning you will encounter increasing west winds and rapidly building seas, owing to a long fetch of brisk west winds of 25-30 kt upstream of your location. The cool, moist flow will result in abundant clouds and occasional rain and mist. Winds and significant wave heights will remain fairly consistent through the end of this forecast period, with average sustained W-NW winds of 20-30 knots and average significant wave heights of 14 to 20 feet.
