Ref A: EMAIL 23 APR 2021 Ref B:

**METSIT 00Z 1-May** Precipitaion related to a frontal boundary extending NW from low pressure near the southern tip of Chile into the Southwest Pacific will begin to clear near your underway time. The next front will bring rain Saturday afternoon. High pressure will build over your track after 03/00Z.

**FORECASTER NOTES** 

To assist with ship tracking and ensure the most accurate forecast possible, please include updated waypoints out to 48hrs with all SITREPs. Winds may differ from those forecast due to funneling/sheltering effects of islands.
