

**SURFACE ANALYSIS 4-May-2022 00Z**

Seas (FT)

**SURFACE FORECAST 5-May-2022 12Z**

**METSIT 00Z 4-May** A quasi-stationary low dominates the early part of this passage, while a more complex series of lows develop for the later part of this forecast period. Gusty winds, strong waves, and intermittently heavy precipitation result. Visibility will be highly variable accordingly.

**FORECASTER NOTES** Winds may differ from those forecast due to funneling/sheltering effects of islands.
