

SURFACE ANALYSIS 15-May-2022 00Z

Seas (FT)

SURFACE FORECAST 16-May-2022 12Z

METSIT 00Z 15-May A bit of rain in the area as you get underway, and a bit more near the end of this first 48 hours of your voyage as a frontal system approaches, also triggering a brief period of notable winds and waves tomorrow late morning/afternoon. A deep low pressure center currently hammering the peninsula area should be out of the picture well before you arrive in those southern waters.

FORECASTER NOTES Winds may differ from those forecast due to funneling/sheltering effects of islands.
