

SURFACE ANALYSIS 29-May-2022 00Z

Seas (FT)

SURFACE FORECAST 30-May-2022 12Z

METSIT 00Z 29-May No significant changes to previous expectations; gusty winds rounding the cape, but not as high as previously anticipated. Gusty again once you reach the passage to Punta Arenas. Spotty showers through the initial part of this period, then mostly clear skies should be overhead the remainder of the way. Congratulations on completing another safe crossing, this is my final forecast unless otherwise advised.

FORECASTER NOTES Winds may differ from those forecast due to funneling/sheltering effects of islands.
