

SURFACE ANALYSIS 31-Dec-2022 06Z

Seas (FT)

SURFACE FORECAST 1-Jan-2023 18Z

METSIT 06Z 31-Dec

Expect generally fair weather to end the year, but a low pressure center making its way into the Drake from the southwest will bring a brief period of snow and slightly gusty winds on New Year's Day. That low should remain far enough to the north of your location as it passes to keep peak winds below 30 knots and seas below 10 feet.

FORECASTER NOTES

Winds may differ from those forecast due to funneling/sheltering effects of islands.
