SURFACE FORECAST 29-Jan-2022 18Z

METSIT 06Z 28-Jan A deepening 989mb Low situated near 57S 152E moves parallel to your track through 29/09Z before moving more eastward and away from your track. This will keep cloudy skies and reduced visibility in rain/fog over your route through almost the entire first half of this forecast. Slightly improved weather is expected through the latter half as a weak ridge of High pressure builds down over your route, but even though the rain ends, cloudy skies persist and the visibility remains reduced in fog.
