

**SURFACE ANALYSIS 29-Jan-2022 06Z**

Seas (FT)

**SURFACE FORECAST 30-Jan-2022 18Z**

**METSIT 06Z 29-Jan** A slightly deepening 979mb Low situated near 62S 174E continues eastward and away from your track, bringing improved conditions early in period. By 30/00Z, a new Low begins to work in from the west, with an associated frontal boundary sweeping out ahead of it keeping cloudy skies and intermittent periods of snow / fog over your track through the vast majority of the period. Winds remain on the lighter side out of the west-northwest, and seas remain workable throughout.
