

SURFACE ANALYSIS 4-Mar-2023 21Z

Seas (FT)

SURFACE FORECAST 6-Mar-2023 06Z

METSIT 21Z 4-Mar Once again, there is currently a lack of significant weather features, therefore, terrain induced conditions will most likely exist. Later in the period a low pressure system moves in from the west bringing in significantly strong winds and seas in open water areas. Winds may differ due to funneling/sheltering effects of the islands.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE NOW IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
