

METSIT 21Z 6-Jun Low pressure moves west to east through the Drake as high pressure builds in on the west side of the peninsula. This set up will create pretty steady conditions through the forecast period. Winds will pickup just slightly near the end. Winds may differ from those forecast due to funneling/sheltering effects of islands.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
