

**METSIT 21Z 6-Mar** A low pressure system will deepen over the course of the forecast period and will move NE before starting a turn and drift S. It is far enough out that there should be minimal impacts around your location. There will be a brief window with some light rain early in the forecast period. Winds will be generally from the NE in the mid teens with slightly higher winds at times. However, terrain induced conditions can still exist, especially closer in land. Winds may differ due to funneling/sheltering effects of the islands.

**FORECASTER NOTES** MCMURDO STATION WINTER OPERATIONS ARE NOW IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
