

METSIT 21Z 12-Jun High pressure ridging will be weakening and moving with a system approaching system from the west. This will result in less clouds and a lot more sun, generally pleasant conditions for the next couple days. As the next approaches, at the end of the period, winds pick up and a line of precipitation develops along a front. Winds may differ from those forecast due to funneling/sheltering effects of islands.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
