

SURFACE ANALYSIS 16-Jun-2023 18Z

Seas (FT)

SURFACE FORECAST 18-Jun-2023 06Z

METSIT 21Z 16-Jun The large broad area of low pressure continues to spin out west. Several other low pressure centers rotate around the broad low with one passing over the science area, that will move across the peninsula to the eastern side. The winds increase through the forecast period as the low approaches. Expect heavy precipitation, with reduced visibilities at times. Winds may differ from those forecast due to funneling/sheltering effects of islands.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
