

Ref A: MOVE REP 23-04 Fishing Dallmann Bay

Ref B:

**METSIT 21Z 22-Apr** The low moving up from the Bellingshausen Sea will weaken over time but still bring significant impacts to the forecast period. A tight pressure gradient keeps the winds fairly strong for the first part of the period before weakening. Expect snow/fog with reduced visibility through most of the period, especially during stronger winds. Winds may differ from those forecast due to funneling/sheltering effects of islands.

**FORECASTER NOTES** MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
