

METSIT 21Z 4-Apr The low pressure to the west, has little movement to it and also fills over most of the forecast period. The next low forms late in the period and will track to the northeast of the science area. The result of all this will bring in sporadic light drizzle/showers or possible light flurries depending on the temperature at the time. Winds continue to be generally light and variable with it increasing at the end of the period. Sea states will be light nearer the land and a bit higher as you move away and into more open waters.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
