

**SURFACE ANALYSIS 13-Apr-2023 18Z**

Seas (FT)

**SURFACE FORECAST 15-Apr-2023 06Z**

**METSIT 21Z 13-Apr** The low pressure system to the west fills pretty rapidly over the forecast period. But a fairly tight pressure gradient and a strong glacial outflow helps keep the winds strong as you progress west. Some precip is forecasted at the end of the period, reducing visibilities.

You are currently far enough west, a different map was used and it doesn't have sea state overlay's available.

**FORECASTER NOTES** MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
