Seas (FT)

SURFACE FORECAST 17-Apr-2023 06Z

METSIT 21Z 15-Apr The low pressure that passed north, moving east, trails weak troughing to the west. This week low pressure will keep the winds into the teens from most of the period, along with cloudy skies. Considering you're still operating in close to shore, sea states will remain relatively shallow. There doesn't appear to be any significant big weather changes through this forecast period.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
