

Ref A: MOVREP 10 MAR 23

Ref B:

METSIT 21Z 19-Mar Strong gusty winds continue with periods of rain throughout the forecast period. As you depart port, a low pressure develops to the southeast of the southern island and rapidly intensifies. Winds pick up significantly while this low deepens. Sea states build pretty fast and will remain high (+20ft) until the low starts moving out of the area, thus decreasing winds and sea states.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE NOW IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
