Ref B:

**SURFACE ANALYSIS 20-Mar-2023 18Z**

Seas (FT)

**SURFACE FORECAST 22-Mar-2023 06Z**

**METSIT 21Z 20-Mar** Strong gusty winds continue with periods of rain through the rest of the day. While you loiter north of Banks Peninsula, you can expect to feel the affects from the low southeast of the southern island, to include strong gusty winds and slightly higher sea states, though not as bad if you would've departed as scheduled. As the low starts to fill, conditions will improve. Clouds start to clear and the rain ends. Winds will weaken a bit, but sea states will remain slightly high.

**FORECASTER NOTES** MCMURDO STATION WINTER OPERATIONS ARE NOW IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
