SURFACE ANALYSIS 23-Jun-2023 18Z

Seas (FT)

SURFACE FORECAST 25-Jun-2023 06Z

METSIT 21Z 23-Jun High pressure continues to build and slow drift eastward through the Drake. This results in fairly steady conditions through the forecast period. Winds blowing to the east start decreasing and swing more to the north as you progress. Obviously all temps start increasing as well. There will be a slight increase in sea states.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
