

**METSIT 21Z 25-Mar** fairly steady conditions continue as you transit west ward on the northern side of the low pressure system. During the late part of the forecast period, a high pressure system will move into the area you'll be transiting. You should start feeling the affects of this system as the winds will switch directions as well as start to weaken. Sea states will remain moderate as the affects of the low continue prior to the high pressure affects take over.

**FORECASTER NOTES** MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
