

**SURFACE ANALYSIS 29-Mar-2023 18Z**

Seas (FT)

**SURFACE FORECAST 31-Mar-2023 06Z**

**METSIT 21Z 29-Mar** All the pressure systems located within the Southern Ocean show very little movement to them. Although, the low pressure you're heading towards will weaken over the forecast period. You'll be facing a generally southeasterly wind direction, mostly in the upper teens. Seas states will increase as you progress south due to that low pressure off the coast. Expect a westerly swell increasing to the mid teens.

**FORECASTER NOTES** MCMURDO STATION WINTER OPERATIONS ARE IN EFFECT. WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
