

METSIT 21Z 1-Mar Your location is right in the middle of an interaction between a deep low pressure to the west and a high pressure to the east bringing strong and gusty northerly winds and seas with rain continuing. Temperatures warm quickly as you continue heading north. As you exit the interaction between the two pressure systems, the rain ends and the winds and seas calm pretty quickly.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE NOW IN EFFECT, WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
