

SURFACE ANALYSIS 27-Feb-2023 21Z

Seas (FT)

SURFACE FORECAST 1-Mar-2023 06Z

METSIT 06Z 27-Feb High pressure ridging continues to build in across your current charted route. Cloudy conditions continue as there will be periods of rain, fog and/or rain and fog, especially as temperatures warm moving north. As the high pressure ridge builds and a low pressure slides south of you, surface winds will swing around, from the current northerly direction, around to southerly, and back from a northerly direction and picking up significant speed at that point.

FORECASTER NOTES MCMURDO STATION WINTER OPERATIONS ARE NOW IN EFFECT, WEAX SUPPORT WILL BE DONE BY THE MCMURDO STATION WEATHER OFFICE AND ISSUED BY 2100Z. SEE CONTACT INFO BELOW.
